

Elizabeth College  
Allotment at  
Edible Guernsey

We have dedicated regular lessons in the year 9 and 10 curriculum to Conservation. Working in the allotment is part of these lessons.

**This is how we started – clearing the land.**

---

Access to water needed to be sorted first.

We bring food waste  
and other compostable  
materials from our  
school once a week.

Composting leaves & shredded green waste from College grounds

---

- We have compost bins in the college
- ( Science block uses it too) AND a compost in the allotment too.

# We use most of our food waste

---

- Fruit & vegetable peelings, and coffee grounds from the Refectory
- Tea bags from the staff kitchen
- Shredded paper from the office
- Grass clippings & shredded green waste from school grounds
- Vraic from the beach

Making the veggie patches

Planting seeds - sometimes in the classroom before transporting them on site.

Bringing mushroom  
compost and manure to  
fertilise the soil.

# Using offcuts to make markers

Fruits of our labour
