

How to build a bumblebee nest

You will need:

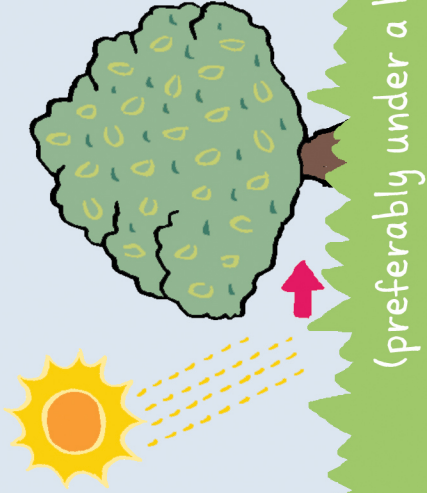

- terracotta flower pot

- trowel

- dry grass or moss

- sheltered spot that gets some sun

1

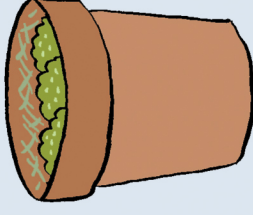

Dig a small, shallow hole under a bush.

Your chosen site should not get too hot or too cold, and be in sun for about half of the day.

2

Fill the flowerpot with dry grass and/or moss.

3

Half-bury the flowerpot upside down in the hole. Position it at an angle so that the hole in the bottom points out.
